

ESCAPE THE NOISE

This kit is being provided to community organisations and businesses as a resource to support people who may experience sensory overload. This kit can help create inclusive and comfortable environments. Having this kit available may allow people to engage and stay longer at events and activities. Noise reducing earmuffs and earplugs take away the background noise, reducing the impact of sudden and loud sounds, while still allowing the user to have a conversation, follow directions and hear emergency warnings.

Contents of kit: Drawstring bag, Information booklet, Display poster, Noise reducing earmuffs, Multiple single use earplugs, Wipes
